

WELCOME TO

# STREAM TRACKER

How to get Started

Visiting Established Sites

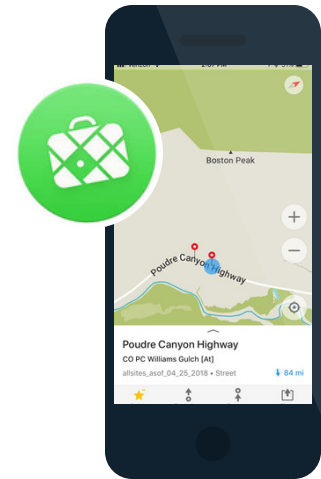

Join the project at <http://citsci.org>  
Search for Stream Tracker under Projects tab and click join

Download the CitSci mobile app AND MAPS.ME (or another 3rd party offline navigation app)  
Log into Citsci app with your CitSci.org login  
Open MAPS.ME and download background map of your region

Download .kmz of Stream Tracker points by visiting [streamtracker.org/resources](http://streamtracker.org/resources).  
Then use .kmz in MAPS.ME to navigate to sites in the field  
Your phone should prompt you to open the .kmz in MAPS.ME

Select the "Streamflow Monitoring" datasheet within the CitSci app then:

Select site name in CitSci app from pick list matching site name to name on .kmz in MAPS.ME

Tap camera icon to add photos

Record flow, no flow, standing water, or other

Once back in cell service, select observations and select "Upload" to add observations to the online project database
