

Travel Zones
Within the travel zone identified on this map, camping is limited to designated sites. Please use camp stoves only to protect these heavily used areas.

Travel zone boundaries shown on the map are defined by ridge tops and generally encompass an entire cirque or drainage. When campsites are filled, one must hike out of the travel zone before setting up camp.

Contour Interval 40 Feet

1 in = 1,000 feet
Scale 1:12,000
